

Fiche 2 BIS : Résolution d'équations Sup

Exercice 1 :

$3x + 7 = 22$	$7x + 12 = 26$	$3x + 7 = x + 13$	$8x + 2 = 2x + 20$
---------------	----------------	-------------------	--------------------

Exercice 2 :

$3x + 4 = 8x - 21$	$-2x + 1 = 7x - 80$	$2x - 3 = 5x + 3$	$5x - 3 = 3x - 5$
--------------------	---------------------	-------------------	-------------------

Exercice 3 :

$2x + 5 = 5x - 4$	$3x - 8 = -8x + 2$	$2x + 1 = x - 4$	$4x - 5 = 2x + 2$
-------------------	--------------------	------------------	-------------------
